Dear Mr. Shepherd:

I appreciate your quick response in evaluating and getting approval of the revised reclamation plan reducing the number of required acres of reclaim from 10 to 6 acres per year. I feel this is an important issue that needed addressed to maintain an efficient resource usage in the future.

In reading your letter to file dated September 14, 1990, I noted on page two, paragraph three that you were left with the impression that the waste dumps were being expanded into the wetlands at this time. I wanted to re-emphasize at this time that no further encroachment on wetlands is taking place. The only waste handling activity currently taking place is the stockpiling and crushing of culled wallboard for the expressed purpose of recycling on top of the north waste dump and the transfer point of waste materials being hauled to the permitted waste dump in the quarry.

Again, thank you very much for processing the approval of the reclamation plan revision and I do hope I cleared up any misconceptions about our waste handling procedures. If there are any questions, please feel free to contact me at (801) 896-4484.

Sincerely,

David M. Hollingshead
